Cancer Letters, 57 (1991) 271—273
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 57

Activity staining, thyroid cancer, dipeptidyl aminopeptidase IV, 203
Alkyl carbamates, rat liver carcinogenesis, γ-glutamyltranspeptidase-positive foci, initiation, promotion, 37
Antiproliferative effect, interferon α, retinoids, combination therapy, 223
Antitumour activity, cytotoxicity, saffron extract, 109
Apocrine antigen, breast carcinoma, monoclonal antibody, 115
Asbestos, benzo[*a*]pyrene, disposition, rats, in vivo, 173
Augmentative hepatomegaly, DNA synthesis, mitogenic amplifier, 83
Autoantibody, phosphatidylinositol, DMBA, mammary tumor, specificity, avidity, 15
Avidity, phosphatidylinositol, DMBA, mammary tumor, autoantibody, specificity, 15

B16-F10 melanoma, N-1554, tumor metastasis, host immune system, 159
Benzo[*a*]pyrene, asbestos, disposition, rats, in vivo, 173
Benzo[*a*]pyrene, DNA adducts, ^{32}P-postlabeling, benzo[*a*]pyrene monooxygenase, fish, 255
Benzo[*a*]pyrene monooxygenase, DNA adducts, ^{32}P-postlabeling, benzo[*a*]pyrene, fish, 255
Breast carcinoma, apocrine antigen, monoclonal antibody, 115

Cadherin, intercellular adhesion, hepatocellular carcinoma, immunohistochemistry, 131
Cancer, prevention, diet, whey proteins, 91
Cancer aetiology, *N*-nitrosamine, simulated nitrosation, foodstuff, 219
Cancer cachexia, lipoprotein lipase, fatty acids, 49
Canine mammary cells, supplemental glutathione, 181
Carcinogenesis, hepatocellular carcinoma, hepatitis B, paracetamol, oxidative metabolism, cytochrome *P*-450, 45
Castanospermine, metastasis, oligosaccharide, swainsonine, deoxymannojirimycin, H-*ras*, 7
Cellular immunity, oral precancer, immune system, leukoplakia, mmune complexes, 1
Changes of GSH level, 2-nitropropane, rat liver DNA damage, cytochrome *P*-450 induction and inhibition, 61
Chemical hepatocarcinogenesis, deoxycholic acid diet, diethylnitrosamine initiation, 153
Combination therapy, antiproliferative effect, interferon α, retinoids, 223
Cyclosporin A, multi-drug resistance, verapamil, doxorubicin, subcellular distribution, 209
Cytochrome *P*-450, hepatocellular carcinoma, hepatitis B, paracetamol, oxidative metabolism, carcinogenesis, 45
Cytochrome *P*-450 induction and inhibition, 2-nitropropane, rat liver DNA damage, changes of GSH level, 61
Cytotoxicity, antitumour activity, saffron extract, 109

Deoxycholic acid diet, chemical hepatocarcinogenesis, diethylnitrosamine initiation, 153
Deoxymannojirimycin, metastasis, oligosaccharide, swainsonine, castanospermine, H-*ras*, 7
Diallyl sulfide, glutathione, glutathione transferase, glutathione peroxidase, glutathione reductase, 121
Dibenz[*a,h*]anthracene, DNA adducts, ^{32}P-postlabeling, 261
Diet, cancer, prevention, whey proteins, 91
Dietary restriction, glutathione, mammary carcinoma, 145
Diethylnitrosamine carbon tetrachloride, liver carcinogenesis, liver cirrhosis, disease models, 67
Diethylnitrosamine initiation, chemical hepatocarcinogenesis, deoxycholic acid diet, 153
7,12-Dimethylbenz[*a*]anthrecene, ^{32}P-postlabeling, DNA adducts, mouse epidermis, stereochemistry, 237
Dipeptidyl aminopeptidase IV, thyroid cancer, activity staining, 203
Disease models, diethylnitrosamine carbon tetrachloride, liver carcinogenesis, liver cirrhosis, 67
Disposition, benzo[*a*]pyrene, asbestos, rats, in vivo, 173
DMBA, phosphatidylinositol, mammary tumor, autoantibody, specificity, avidity, 15
DNA adducts, dibenz[*a,h*]anthracene, ^{32}P-postlabeling, 261
DNA adducts, human skin, mouse skin, engine lubricating oils, polycyclic aromatic hydrocarbons, 229
DNA adducts, ^{32}P-postlabeling, 7,12-dimethylbenz[*a*]anthrecene, mouse epidermis, stereochemistry, 237
DNA adducts, ^{32}P-postlabeling, benzo[*a*]pyrene monooxygenase, benzo[*a*]pyrene, fish, 255
DNA synthesis, augmentative hepatomegaly, mitogenic amplifier, 83
Double strand breaks, fibroblasts, radiosensitivity, non-Hodgkin's lymphoma, 137
Doxorubicin, multi-drug resistance, verapamil, cyclosporin A, subcellular distribution, 209

Ehrlich (ascites) carcinoma, influence, *N*-(*o*-methoxyphenyl)-maleimide, 5-fluorouracil, 21
Engine lubricating oils, human skin, mouse skin, polycyclic aromatic hydrocarbons, DNA adducts, 229
Enzyme-altered foci, phenobarbital, rat liver, tumor promotion, 75
Epidermal growth factor, tumor necrosis factor, 103

Fatty acids, lipoprotein lipase, cancer cachexia, 49
Fibroblasts, double strand breaks, radiosensitivity, non-Hodgkin's lymphoma, 137
Fish, DNA adducts, ^{32}P-postlabeling, benzo[*a*]pyrene monooxygenase, benzo[*a*]pyrene, 255
5-Fluorouracil, influence, *N*-(*o*-methoxyphenyl)-maleimide, Ehrlich (ascites) carcinoma, 21
Foodstuff, *N*-nitrosamine, simulated nitrosation, cancer aetiology, 219

Gas chromatography-mass spectrometry, *S*-benzylmercapturic acid, rat, urine, *N*-nitroso-*N*-methylbenzylamine, 193
Gli, ras, glioma, image-analysis, in situ hybridization, 243
Glioma, *ras*, *gli*, image-analysis, in situ hybridization, 243
γ-Glutamyltranspeptidase-positive foci, rat liver carcinogenesis, alkyl carbamates, initiation, promotion, 37
Glutathione, dietary restriction, mammary carcinoma, 145
Glutathione, glutathione transferase, diallyl sulfide, glutathione peroxidase, glutathione reductase, 121
Glutathione peroxidase, glutathione, glutathione transferase, diallyl sulfide, glutathione reductase, 121
Glutathione reductase, glutathione, glutathione transferase, diallyl sulfide, glutathione peroxidase, 121
Glutathione transferase, glutathione, diallyl sulfide, glutathione peroxidase, glutathione reductase, 121
Glycolipids, sulfotransferase, Wilms' tumor, renal cell carcinoma, 187
Glycosylation, human mammary epithelium, immortalization, transformation, 27

H-*ras*, metastasis, oligosaccharide, swainsonine, castanospermine, deoxymannojirimycin, 7
Hepatitis B, hepatocellular carcinoma, paracetamol, oxidative metabolism, carcinogenesis, cytochrome *P*-450, 45
Hepatocellular carcinoma, cadherin, intercellular adhesion, immunohistochemistry, 131
Hepatocellular carcinoma, hepatitis B, paracetamol, oxidative metabolism, carcinogenesis, cytochrome *P*-450, 45
Host immune system, N-1554, B16-F10 melanoma, tumor metastasis, 159
Human mammary epithelium, glycosylation, immortalization, transformation, 27
Human skin, mouse skin, engine lubricating oils, polycyclic aromatic hydrocarbons, DNA adducts, 229
8-Hydroxydeoxyguanosine, peroxisome proliferators, perfluorooctanoic acid, perfluorodecanoic acid, oxidative DNA damage, 55

Image-analysis, *ras*, *gli*, glioma, in situ hybridization, 243
Immortalization, glycosylation, human mammary epithelium, transformation, 27
Immune complexes, oral precancer, immune system, leukoplakia, cellular immunity, 1
Immune system, oral precancer, leukoplakia, cellular immunity, immune complexes, 1
Immunohistochemistry, cadherin, intercellular adhesion, hepatocellular carcinoma, 131
Influence, *N*-(*o*-methoxyphenyl)-maleimide, 5-fluorouracil, Ehrlich (ascites) carcinoma, 21
Initiation, rat liver carcinogenesis, alkyl carbamates, γ-glutamyltranspeptidase-positive foci, promotion, 37
Intercellular adhesion, cadherin, hepatocellular carcinoma, immunohistochemistry, 131
Interferon α, antiproliferative effect, retinoids, combination therapy, 223
In situ hybridization, *ras*, *gli*, glioma, image-analysis, 243
In vivo, benzo[*a*]pyrene, asbestos, disposition, rats, 173

Leukoplakia, oral precancer, immune system, cellular immunity, immune complexes, 1
Lipoprotein lipase, cancer cachexia, fatty acids, 49
Liposomes, P-glycoprotein, multidrug resistance, 165
Liver carcinogenesis, diethylnitrosamine carbon tetrachloride, liver cirrhosis, disease models, 67
Liver cirrhosis, diethylnitrosamine carbon tetrachloride, liver carcinogenesis, disease models, 67

Mammary carcinoma, glutathione, dietary restriction, 145
Mammary tumor, phosphatidylinositol, DMBA, autoantibody, specificity, avidity, 15
Melanoma B16, superoxide dismutase, metastatic cells, 199
Metastasis, oligosaccharide, swainsonine, castanospermine, deoxymannojirimycin, H-*ras*, 7
Metastatic cells, superoxide dismutase, melanoma B16, 199
Mitogenic amplifier, DNA synthesis, augmentative hepatomegaly, 83
Monoclonal antibody, apocrine antigen, breast carcinoma, 115
Mouse, tetranitromethane, pulmonary carcinogenesis, nasal irritation, rat, 95
Mouse epidermis, ^{32}P-postlabeling, 7,12-dimethylbenz[*a*]anthrecene, DNA adducts, stereochemistry, 237
Mouse skin, human skin, engine lubricating oils, polycyclic aromatic hydrocarbons, DNA adducts, 229
Multi-drug resistance, verapamil, cyclosporin A, doxorubicin, subcellular distribution, 209
Multidrug resistance, liposomes, P-glycoprotein, 165

N-(*o*-Methoxyphenyl)-maleimide, influence, 5-fluorouracil, Ehrlich (ascites) carcinoma, 21
N-1554, B16-F10 melanoma, tumor metastasis, host immune system, 159
N-Nitrosamine, simulated nitrosation, foodstuff, cancer aetiology, 219

N-nitroso-*N*-methylbenzylamine, *S*-benzylmercapturic acid, rat, urine, gas chromatography-mass spectrometry, 193
Nasal irritation, tetranitromethane, pulmonary carcinogenesis, rat, mouse, 95
2-Nitropropane, rat liver DNA damage, cytochrome *P*-450 induction and inhibition, changes of GSH level, 61
Non-Hodgkin's lymphoma, fibroblasts, double strand breaks, radiosensitivity, 137

Oligosaccharide, metastasis, swainsonine, castanospermine, deoxymannojirimycin, H-*ras*, 7
Oral precancer, immune system, leukoplakia, cellular immunity, immune complexes, 1
Oxidative DNA damage, peroxisome proliferators, perfluorooctanoic acid, perfluorodecanoic acid, 8-hydroxydeoxyguanosine, 55
Oxidative metabolism, hepatocellular carcinoma, hepatitis B, paracetamol, carcinogenesis, cytochrome *P*-450, 45

P-glycoprotein, liposomes, multidrug resistance, 165
Paracetamol, hepatocellular carcinoma, hepatitis B, oxidative metabolism, carcinogenesis, cytochrome *P*-450, 45
Perfluorodecanoic acid, peroxisome proliferators, perfluorooctanoic acid, 8-hydroxydeoxyguanosine, oxidative DNA damage, 55
Perfluorooctanoic acid, peroxisome proliferators, perfluorodecanoic acid, 8-hydroxydeoxyguanosine, oxidative DNA damage, 55
Peroxisome proliferators, perfluorooctanoic acid, perfluorodecanoic acid, 8-hydroxydeoxyguanosine, oxidative DNA damage, 55
Phenobarbital, rat liver, tumor promotion, enzyme-altered foci, 75
Phosphatidylinositol, DMBA, mammary tumor, autoantibody, specificity, avidity, 15
Polycyclic aromatic hydrocarbons, human skin, mouse skin, engine lubricating oils, DNA adducts, 229
^{32}P-Postlabeling, 7,12-dimethylbenz[*a*]anthrecene, DNA adducts, mouse epidermis, stereochemistry, 237
^{32}P-Postlabeling, DNA adducts, benzo[*a*]pyrene monooxygenase, benzo[*a*]pyrene, fish, 255
^{32}P-Postlabeling, dibenz[*a*,*h*]anthracene, DNA adducts, 261
Prevention, cancer, diet, whey proteins, 91
Promotion, rat liver carcinogenesis, alkyl carbamates, γ-glutamyltranspeptidase-positive foci, initiation, 37
Pulmonary carcinogenesis, tetranitromethane, nasal irritation, rat, mouse, 95

Radiosensitivity, fibroblasts, double strand breaks, non-Hodgkin's lymphoma, 137
ras, *gli*, glioma, image-analysis, in situ hybridization, 243
Rat, *S*-benzylmercapturic acid, urine, *N*-nitroso-*N*-methylbenzylamine, gas chromatography-mass spectrometry, 193
Rat, tetranitromethane, pulmonary carcinogenesis, nasal irritation, mouse, 95
Rats, benzo[*a*]pyrene, asbestos, disposition, in vivo, 173
Rat liver, phenobarbital, tumor promotion, enzyme-altered foci, 75
Rat liver carcinogenesis, alkyl carbamates, γ-glutamyltranspeptidase-positive foci, initiation, promotion, 37
Rat liver DNA damage, 2-nitropropane, cytochrome *P*-450 induction and inhibition, changes of GSH level, 61
Renal cell carcinoma, glycolipids, sulfotransferase, Wilms' tumor, 187
Retinoids, antiproliferative effect, interferon α, combination therapy, 223
S-Benzylmercapturic acid, rat, urine, *N*-nitroso-*N*-methylbenzylamine, gas chromatography-mass spectrometry, 193
Saffron extract, antitumour activity, cytotoxicity, 109
Simulated nitrosation, *N*-nitrosamine, foodstuff, cancer aetiology, 219
Specificity, phosphatidylinositol, DMBA, mammary tumor, autoantibody, avidity, 15
Stereochemistry, ^{32}P-postlabeling, 7,12-dimethylbenz[*a*]anthrecene, DNA adducts, mouse epidermis, 237
Subcellular distribution, multi-drug resistance, verapamil, cyclosporin A, doxorubicin, 209
Sulfotransferase, glycolipids, Wilms' tumor, renal cell carcinoma, 187
Superoxide dismutase, metastatic cells, melanoma B16, 199
Supplemental glutathione, canine mammary cells, 181
Swainsonine, metastasis, oligosaccharide, castanospermine, deoxymannojirimycin, H-*ras*, 7

Tetranitromethane, pulmonary carcinogenesis, nasal irritation, rat, mouse, 95
Thyroid cancer, dipeptidyl aminopeptidase IV, activity staining, 203
Transformation, glycosylation, human mammary epithelium, immortalization, 27
Tumor metastasis, N-1554, B16-F10 melanoma, host immune system, 159
Tumor necrosis factor, epidermal growth factor, 103
Tumor promotion, phenobarbital, rat liver, enzyme-altered foci, 75

Urine, *S*-benzylmercapturic acid, rat, *N*-nitroso-*N*-methylbenzylamine, gas chromatography-mass spectrometry, 193

Verapamil, multi-drug resistance, cyclosporin A, doxorubicin, subcellular distribution, 209

Whey proteins, cancer, prevention, diet, 91
Wilms' tumor, glycolipids, sulfotransferase, renal cell carcinoma, 187

Cancer Letters, 57 (1991) 275—276
Elsevier Scientific Publishers Ireland Ltd.
